WAY UP is a unique three-book series which gently guides young learners of English from beginner through to pre-intermediate level. Its innovative, practical approach focuses on providing students with a supportive framework in which they can develop confidence in their receptive and productive skills.

Every unit in Book 2 is divided into the following sections:

Reading:	stimulating level-appropriate material, designed to elicit maximum student response in the key areas of comprehension and vocabulary.
Story:	an entertaining adventure story in which students meet likeable characters and follow them on their exciting adventures.
Speaking / Listening:	here students are given a variety of speaking and listening activities which aid in the development of their oral and aural skills.
Writing:	step-by-step skills and oral preparation exercises as well as model writing tasks provide learners with a firm grounding in the early stages of writing.
Everyday English:	topic-related contextualised vocabulary along with dialogues to enable students to use everyday English naturally and effectively.

In every unit there is a special Enrich your English section the purpose of which is to broaden students' knowledge and enhance their language awareness.

One of the highlights of the WAY UP series is the **Oral Practice** and **Oral Summary** sections. The techniques employed in these sections are designed to help students turn passive learning into active learning.
